

Sign & Panel Support Systems

Brass Edge Grip & Projecting Panel Supports

Ideal for mounting identification and directional signage, wall plaques and displays. The edge grips and projecting supports don't require drilling holes into substrates. They allow the panel to be gripped from sides or top and bottom. Exclusive use of brass, anodized to a satin finish make it great-looking, timeless, and aesthetically effective. Edge grip supports are available for panels up to 10mm (3/8") thick...
