

## CS09 Rod Support Fixing

**IMPORTANT:** It is essential to check that the top ceiling fixings are strong enough to take the weight of the items being displayed while allowing for the tension in the cables.

- 1) Install cables as per "Cable Fixing Instructions" for CA4 supplied.
- 2) Fix rod supports (A) onto cables. Adjust supports vertically and horizontally, preferably with a spirit level. Repeat procedure for other supports.
- 3) Loosen the set screws on the rod support (B), and slide the rod (C) into the open cavities at required position. Then tighten back the set screws with Allen Key provided. Rod needs to be cut to size before attaching to the cable.
- 4) Attach the decorative end cap (D) to both ends of the rod.
- 5) Attach your acrylic accessories (E) to the rod.

**NOTE:** It is important to check the strength of the ceiling fixing(s). NOVA DISPLAY® takes no responsibility for incorrect installation. This responsibility relies with the installer.

Cables are not supplied with fixing screws.

## INSTALLATION TIPS
