

Brass Edge Grip Support Installation

****Always check the installation surface to ensure that the substrate will be strong enough to hold the weight of the panel. All installation must be done so with proper hardware and protective gears to ensure safety.**

- 1) With the panel prepped and ready for installation, install the Edge Grips on the panels.
(Marking the grip locations on the panel is recommended).

The panel needs to sit as far into the opening as possible.

A) Unscrew the Edge Grip Caps.

B) Use Set Screw under the Caps to secure the Edge Grip to the panel.

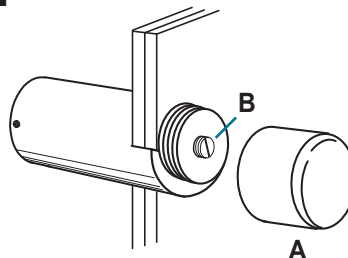

Repeat until all Edge Grips are mounted on the panel.

- 2) With all grips mounted securely on the panel.
Using the panel/grips as a template, mark the point on the installation surface for drilling.

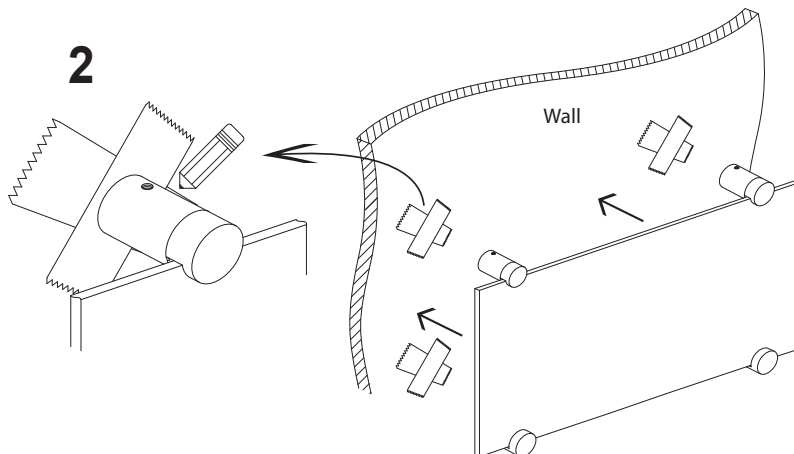

- 3) Install wall anchors. Use proper installation hardware.

- 3) After the anchors are mounted to the wall, slide the grips/panel onto the anchors. Tighten the outside M4 set screw once all grips are seated flush against the anchors.
