CABLE SUSPENDED LED LIGHT POCKETS

FEATURES & BENEFITS

Quality upscale appearance ...

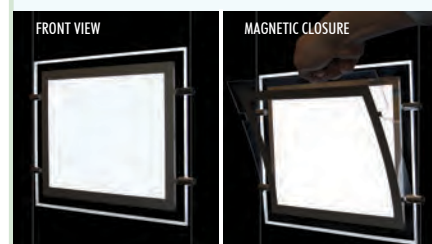

- They are incredibly bright and will make your window or wall displays to stand out, maximizing your display space and drawing more attention to your promotional messages from potential buyers.
- Designed as a slim line magnetic open style frame, with glowing edges that creates intrigue and draws attention to the eye from a distance. It is less than 12mm (1/2") thick.
- Supplied in a range of standard sizes, with single or double sided capabilities.
- Very upmarket appearance and yet competitively priced.
- Integrates with back lit ink-jet prints (*duratrans films*) or 90gsm paper (*without water marks*).
- Suspended from low voltage powered cables fitted between the floor & ceiling.

High energy efficiency ...

- Manufactured with ultra-bright LED lighting - uses a fraction of the electricity of standard light boxes
- Even spread of light - no dark shadows appear ensuring that your graphic is crisp and punchy.
- Maintenance free - lamp life is between 50-60,000 hours. No need to change lamps or tubes, saving time and money.

Quick and easy to install ...

- Cable LED Light Pockets are supplied as a kit complete with small AC power supply (*no large transformer to hide*), cable fittings, power connectors, and the acrylic led/frames with cable supports pre-attached.
- Power connectors attach simply onto the cable. All you need to complete the installation is an electrical outlet within 6-12 feet of the display unit.

3 STEP OPTIONAL CABLE FITTINGS FOR SUPPORTING LOGO/INFO PANELS ...

SIDE CLAMP SUPPORT

SUPPORT WITH HOLES

TOP/BOTTOM SUPPORT

- use CG01 cable fitting to support logo or info panels above or below the acrylic led/frames.
- panels do not require drilling.
- verify the panel size and cable centers before ordering.

SUPPORT FITTINGS FOR LOGO/INFO PANELS

- use CG09 cable fitting to support logo or info panels above or below the acrylic led/frames.
- panels do not require drilling and need to be wider than the distance between cable centers.

- use CS13 cable fitting to support logo or info panels above or below the acrylic led/frames.
- panels require drilling to correspond with the distance between cable centers.

OPTIONAL TRACK MOUNTING

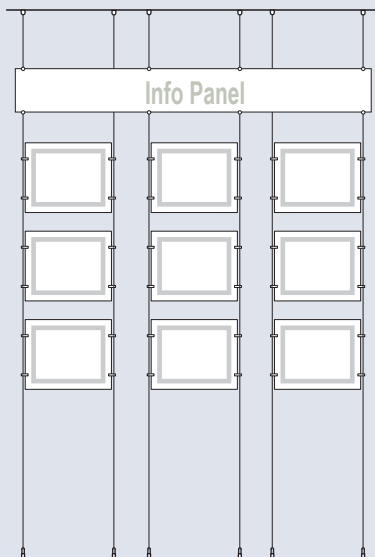

- use AC-8 rebate track/channel with CA4 cable kits to add flexibility to your displays.
- always use top PC01/I insulator and bottom SP/IS insulator.
- use AT/L toggle for fixing the cable fixings to track.
